Within the initiatives planned by P.I. Huang recalling the theme

“LIGHT UP ROTARY”

On request by I.B.D. Giuseppe Viale, the Italian Governors have organized a national event with the goal to disseminate Italian Rotary’s activities in terms of service actions on the territory.

In this peculiar historical moment, the Mediterranean Sea represents a significant area to be highlighted by a Forum titled:

“United Mediterraneo”

Where we can report and discuss with other Rotary Governors and experts on: the migration phenomena and respective laws, war hotbeds, sea health, blue economy, harbors traffic and network, the national task force for country protection, archeology and further related topics.

At the same time, two actions have been activated in favor of migrants: one scholarship as well as a humanitarian plan.

The present event is going to involve International, National and Local Public Institutions, as well as Rotaract, Interact and other service organizations representatives, also with an exhibition of works carried out and projection of significant clips.
